Subject: Input to IPA III regulation

Follow Up Flag: Follow up
Flag Status: Flagged

Dear TACSO team,

Being environmental protection organization in Kosovo and based on our five years experience in the field we would propose to add Social Enterprise and Circular Economy promotion and Endangered Species Conservation under Window 3 - Green Agenda and Sustainable connectivity.

Also, to ensure long-term sustainability of Civil Society Organisations in WB countries we propose that IPA III provide more operational and institutional funds to CSO

Moreover, in order to avoid any potential corruption during the whole process we propose that the management of the whole IPA III fund to be centralized and managed by the EU Commission directly, not through EU Delegation or any other body in WB countries.

Hope that our comments and proposal might contribute in shaping the IPA III fund regulation

Best regards,
Urim Xharavina
